Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 61, 63-65, 67, 69, 70-71 and 72-73 are rejected under 35 U.S.C. 102(e) as being anticipated by Crocker et al-5,569,184.

As to claims 61, 63-65, 67, 69, 71 and 73 Crocker-'184 (Figs. 13-16) shows distal shaft 106, proximal metal hypotube 118, port 108 communicating with an inner shaft and defining guidewire lumen 112, heat shrinkable sleeve 120 having port 108 formed at least partially within (a longitudinal region of) the proximal shaft 118 (having lumen 116, please see Fig. 12-14, and especially Fig. 15) and at least partially formed in the distal shaft 106 as recited in the claims.

As to claims 70 and 72, from Fig. 15, in a broad sense, port 108 is formed in the distal shaft 106 and in (a longitudinal region of) the proximal shaft 118 as well.

Response to Amendment

The amendment filed on 8/2/2005 under 37 CFR 1.131 has been carefully considered but has not been clearly defined over the Crocker et al-5,569,184 reference as indicated in the above rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.
